Vehicle Type Performance

Vehicle Type

Avg Customer Ratings by Vehicle

Vehicle	Rating
Prime Plus	4.01
Prime Sedan	4.00
Prime SUV	4.00
Mini	4.00
Auto	4.00
Bike	3.99
eBike	3.99

Auto has significantly shorter avg distance (6.24 km) vs all others (~15.5 km). Ratings are consistently ~4.0/5 across all types.

Cancellation Analysis

Customer Cancellations

Driver Cancellations

Driver-related issues drive **over 55%** of customer cancellations. Vehicle maintenance and driver support can reduce driver cancellations significantly.

Business Recommendations

Reduce Cancellations

Improve driver allocation, monitor pickup movement, add cancellation penalties

Customer Satisfaction

Vehicle inspections, AC maintenance, pickup accuracy

Increase Revenue

Loyalty programs, digital payment incentives, subscription offers

Driver Performance

Training programs, performance incentives, vehicle support

Conclusion

Executive Summary

Key finding: The business achieved a **62% success rate**, but the **28% cancellation rate** remains the most important operational challenge to address.

Business impact: These improvements support more than **₹35M in revenue**, showing the value of stronger trip completion and service reliability.

Strategic priorities: Focus on reducing cancellations through better driver allocation, tighter pickup accuracy, and incentives that improve driver performance.

Call to action: Implement the recommended actions immediately, track performance weekly, and use the dashboard to prioritize the highest-impact fixes.

Bottom line: Protecting completed rides and reducing cancellations will unlock the next stage of growth.
